Sacred Civics argues that societal transformation requires that spirituality and sacred values are essential to reimagining patterns of how we live, organize and govern ourselves, determine and distribute wealth, inhabit and design cities, and construct relationships with others and with nature. The book brings together transdisciplinary and global academics, professionals, and activists from a range of backgrounds to question assumptions that are fused deep into the code of how societies operate, and to draw on extraordinary wisdom from ancient Indigenous traditions; to social and political movements like Black Lives Matter, the

commons, and wellbeing economies; to technologies for participatory futures where people collaborate to reimagine and change culture. Looking at cities and human settlements as the sites of transformation, the book focuses on values, commons, and wisdom to demonstrate that how we choose to live together, to recognize interdependencies, to build, grow, create, and love—matters. Using multiple methodologies to integrate varied knowledge forms and practices, this truly ground-breaking volume includes contributions from renowned and rising voices. *Sacred Civics* is a must-read for anyone interested in intersectional discussions on social justice, inclusivity, participatory design, healthy communities, and future cities.

Reflections of a Wanna B Cowboy is the author's fifth book. *Reflections* is essentially Lindsey's autobiography written in "talk story" format. Talking story is a way of communicating among locals in the islands. Lindsey and his grandson Samuel Kamaile are its main characters. Its basic message is, we are global citizens. Author's Statement *Reflections of a Wanna B Cowboy* is my personal life story. *Reflections* is a story about an unfulfilled dream. I wanted so much as a kid to be a cowboy on the Parker Ranch when I became a man—a dream I dreamed countless times. But as oft happens to so many of us, this life force called destiny intervened and altered my plan. With my oldest grandson Samuel's help as facilitator, in this autobiography of sixty snippets, I tell my story for our grandsons to remember their Tutu (grandma) and me by. *Reflections* has a larger message: we are citizens of the world.

Let's face it, teaching secondary math can be hard. So much about how we teach math today may look and feel different from how we learned it. Teaching math in a student-centered way changes the role of the teacher from one who traditionally "delivers knowledge" to one who fosters thinking. Most importantly, we must ensure our practice gives each and every student the opportunity to learn, grow, and achieve at high levels, while providing opportunities to develop their agency and authority in the classroom which results in a positive math identity. Whether you are a brand new teacher or a veteran, if you find teaching math to be quite the challenge, this is the guide you want by your side. Designed for just-in-time learning and support, this practical resource gives you brief, actionable answers to your most pressing questions about teaching secondary math. Written by four experienced math educators representing diverse experiences, these authors offer the practical advice they wish they received years ago, from lessons they've learned over decades of practice, research, coaching, and through collaborating with teams, teachers and colleagues—especially new teachers—every day. Questions and answers are organized into five areas of effort that will help you most thrive in your secondary math classroom: How do I build a positive math community? How do I structure, organize, and manage my math class? How do I engage my students in math? How do I help my students talk about math? How do I know what my students know and move them forward? Woven throughout, you'll find helpful sidebar notes on fostering identity and agency; access and equity; teaching in different settings; and invaluable resources for deeper learning. The final question—Where do I go from here?—offers guidance for growing your practice over time. Strive to become the best math educator you can be; your students are counting on it! What will be your first step on the journey?

Conversational in tone and providing highly practical advice for new deans, *Reflections of a Rookie Dean: Lessons from the First Year* chronicles the experiences of a novice college leader. Providing aspiring and new deans with insight and direction into the job of leading a college, this book is well positioned to help new leaders develop a better understanding of leadership in higher education and the challenges that new deans face. Deans, who function as middle managers in higher education, face a distinctive set of challenges. They are responsible for leading their college, implementing shared strategies, and motivating staff. But, they are also expected to enact the vision of senior leadership and mobilize support for broader institutional goals. To be successful, they must be skilled at managing both up and down the institutional hierarchy. This book provides insight into:

- Understanding what effective leadership looks like in practice
- Developing leaders in your college
- Understanding how to initiate and implement change
- Considering the ethical aspects of leading
- Understanding how your leadership and college fits within the larger university
- Strategically thinking about decision-making
- Understanding the rhythms of serving as a new dean and leader

book is a must have for aspiring college leaders, organizers of leadership development programs, and university professors teaching coursework in higher education administration. Whether you are planning to be a college leader, are new to your role, or are looking to build capacity in your college, Reflections of a Rookie Dean can help you along your leadership journey.

The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

A sobering account of a disenfranchised American working class and important policy solutions to the nation's economic inequalities One of the country's leading scholars on economics and social policy, Isabel Sawhill addresses the enormous divisions in American society--economic, cultural, and political--and what might be done to bridge them. Widening inequality and the loss of jobs to trade and technology has left a significant portion of the American workforce disenfranchised and skeptical of governments and corporations alike. And yet both have a role to play in improving the country for all. Sawhill argues for a policy agenda based on mainstream values, such as family, education, and work. Although many have lost faith in government programs designed to help them, there are still trusted institutions on both the local and the federal level that can deliver better job opportunities and higher wages to those who have been left behind. At the same time, the private sector needs to reexamine how it trains and rewards employees. This book provides a clear-headed and middle-way path to a better-functioning society in which personal responsibility is honored and inclusive capitalism and more broadly shared growth are once more the norm.

A comparative study of citizenship education and adolescent political attitudes in five western democracies.

Golding ' s iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.
