#1 New York Times Bestseller The creator of the 100 Days of Real Food blog draws from her hugely popular website to offer simple, affordable, family-friendly recipes and practical advice for eliminating processed foods from your family's diet. Inspired by Michael Pollan's *In Defense of Food*, Lisa Leake decided her family's eating habits needed an overhaul. She, her husband, and their two small girls pledged to go 100 days without eating highly processed or refined foods—a challenge she opened to readers on her blog. Now, she shares their story, offering insights and cost-conscious recipes everyone can use to enjoy wholesome natural food—whole grains, fruits and vegetables, seafood, locally raised meats, natural juices, dried fruit, seeds, popcorn, natural honey, and more. Illustrated with 125 photographs and filled with step-by-step instructions, this hands-on cookbook and guide includes: Advice for navigating the grocery store and making smart purchases Tips for reading ingredient labels 100 quick and easy recipes for such favorites as Homemade Chicken Nuggets, Whole Wheat Pasta with Kale Pesto Cream Sauce, and Cinnamon Glazed Popcorn Meal plans and suggestions for kid-pleasing school lunches, parties, and snacks "Real Food" anecdotes from the Leakes' own experiences A 10-day mini starter-program, and much more.

Food, Inc. is guaranteed to shake up our perceptions of what we eat. This powerful documentary deconstructing the corporate food industry in America was hailed by *Entertainment Weekly* as “ more than a terrific movie—it's an important movie. ” Aided by expert commentators such as Michael Pollan and Eric Schlosser, the film poses questions such as: Where has my food come from, and who has processed it? What are the giant agribusinesses and what stake do they have in maintaining the status quo of food production and consumption? How can I feed my family healthy foods affordably? Expanding on the film's themes, the book *Food, Inc.* will answer those questions through a series of

challenging essays by leading experts and thinkers. This book will encourage those inspired by the film to learn more about the issues, and act to change the world.

The must-read summary of Karl Weber's book: " Food, Inc.: How Industrial Food is Marketing Us Sicker, Fatter, and Poorer - And What You Can Do About it ". This complete summary of "Food, Inc." by Karl Weber, a collection of challenging essays by leading experts, presents the work's insight into the health issues created by the food industry and offers ways of circumnavigating these problems. Added-value of this summary: • Save time • Understand how the food industry impacts public health • Expand your knowledge of American politics and industry To learn more, read "Food, Inc." and discover how to avoid the health problems posed by the food industry.

#1 New York Times Bestseller from the author of How to Change Your Mind, The Omnivore's Dilemma, and Food Rules Food. There's plenty of it around, and we all love to eat it. So why should anyone need to defend it? Because in the so-called Western diet, food has been replaced by nutrients, and common sense by confusion--most of what we ' re consuming today is longer the product of nature but of food science. The result is what Michael Pollan calls the American Paradox: The more we worry about nutrition, the less healthy we see to become. With In Defense of Food, Pollan proposes a new (and very old) answer to the question of what we should eat that comes down to seven simple but liberating words: "Eat food. Not too much. Mostly plants." Pollan ' s bracing and eloquent manifesto shows us how we can start making thoughtful food choices that will enrich our lives, enlarge our sense of what it means to be healthy, and bring pleasure back to eating.

For most people, the global war over genetically modified foods is a distant and confusing one. The battles are conducted in the mystifying language of genetics. A handful of corporate "life science" giants, such as Monsanto, are pitted against a worldwide network of anticorporate ecowarriors like Greenpeace. And yet the possible benefits of biotech agriculture to our food supply are too vital to be left to either partisan. The companies claim to be leading a new agricultural revolution that will save the world with crops modified to survive frost, drought, pests, and plague. The greens warn that "playing God" with plant genes is dangerous. It could create new allergies, upset ecosystems, destroy biodiversity, and produce uncontrollable mutations. Worst of all, the antiotech forces say, a single food conglomerate could end up telling us what to eat. In *Food, Inc.*, acclaimed journalist Peter Pringle shows how both sides in this overheated conflict have made false promises, engaged in propaganda science, and indulged in fear-mongering. In this urgent dispatch, he suggests that a fertile partnership between consumers, corporations, scientists, and farmers could still allow the biotech harvest to reach its full potential in helping to overcome the problem of world hunger, providing nutritious food and keeping the environment healthy.

Documents the troubling influence of a small group of scientists who the author contends misrepresent scientific facts to advance key political and economic agendas, revealing the interests behind their detractions on findings about acid rain, DDT, and other hazards.

Documentary film can encompass anything from Robert Flaherty's pioneering ethnography *Nanook of the North* to Michael Moore's anti-Iraq War polemic *Fahrenheit 9/11*, from Dziga Vertov's artful Soviet propaganda piece *Man with a Movie Camera* to Luc Jacquet's heart-tugging wildlife epic *March*

of the Penguins. In this concise, crisply written guide, Patricia Aufderheide takes readers along the diverse paths of documentary history and charts the lively, often fierce debates among filmmakers and scholars about the best ways to represent reality and to tell the truths worth telling. Beginning with an overview of the central issues of documentary filmmaking--its definitions and purposes, its forms and founders--Aufderheide focuses on several of its key subgenres, including public affairs films, government propaganda (particularly the works produced during World War II), historical documentaries, and nature films. Her thematic approach allows readers to enter the subject matter through the kinds of films that first attracted them to documentaries, and it permits her to make connections between eras, as well as revealing the ongoing nature of documentary's core controversies involving objectivity, advocacy, and bias. Interwoven throughout are discussions of the ethical and practical considerations that arise with every aspect of documentary production. A particularly useful feature of the book is an appended list of "100 great documentaries" that anyone with a serious interest in the genre should see. Drawing on the author's four decades of experience as a film scholar and critic, this book is the perfect introduction not just for teachers and students but also for all thoughtful filmgoers and for those who aspire to make documentaries themselves. About the Series: Combining authority with wit, accessibility, and style, Very Short Introductions offer an introduction to some of life's most interesting topics. Written by experts for the newcomer, they demonstrate the finest contemporary thinking about the central problems and issues in hundreds of key topics, from philosophy to Freud, quantum theory to Islam.

Forty-nine million people—including one in four children—go hungry in the U.S. every day, despite our having the means to provide nutritious, affordable food for all. Inspired by the acclaimed documentary *A Place at the Table*, this companion book offers powerful insights from those at the front lines of solving

Originally released in 1998, *Documenting the Documentary* responded to a scholarly landscape in which documentary film was largely understudied and undervalued aesthetically, and analyzed instead through issues of ethics, politics, and film technology. Editors Barry Keith Grant and Jeannette Sloniowski addressed this gap by presenting a useful survey of the artistic and persuasive aspects of documentary film from a range of critical viewpoints. This new edition of *Documenting the Documentary* adds five new essays on more recent films in addition to the text of the first edition. Thirty-one film and media scholars, many of them among the most important voices in the area of documentary film, cover the significant developments in the history of documentary filmmaking from *Nanook of the North* (1922), the first commercially released documentary feature, to contemporary independent film and video productions like Werner Herzog's *Grizzly Man* (2005) and the controversial *Borat* (2006). The works discussed also include representative examples of many important national and stylistic movements and various production contexts, from mainstream to avant-garde. In all, this volume offers a series of rich and revealing analyses of those "regimes of truth" that still fascinate filmgoers as much today as they did at the very beginnings of film history. As documentary film and visual media become increasingly important ways for audiences to process news and information, *Documenting the Documentary* continues to be a vital resource to understanding the genre. Students and teachers of film studies and fans of documentary film will appreciate this expanded classic volume.

The book that helped make Michael Pollan, the New York Times bestselling author of *How to Change Your Mind*, *Cooked* and *The Omnivore's Dilemma*, one of the most trusted food experts in America Every schoolchild learns about the mutually beneficial dance of honeybees and flowers: The bee collects nectar and pollen to make honey and, in the process, spreads the flowers' genes far and wide. In *The*

Botany of Desire, Michael Pollan ingeniously demonstrates how people and domesticated plants have formed a similarly reciprocal relationship. He masterfully links four fundamental human desires—sweetness, beauty, intoxication, and control—with the plants that satisfy them: the apple, the tulip, marijuana, and the potato. In telling the stories of four familiar species, Pollan illustrates how the plants have evolved to satisfy humankind ' s most basic yearnings. And just as we ' ve benefited from these plants, we have also done well by them. So who is really domesticating whom?
